Japan Announces JFY2011 Review Schedule for Agricultural Chemicals

Report Categories:

Sanitary/Phytosanitary/Food Safety

Approved By:Jennifer Clever **Prepared By:**

Suguru Sato

Report Highlights:

On May 13, 2011, the Government of Japan announced the schedule for agricultural chemical reviews that will take place during the Japanese Fiscal Year 2011 (April 1, 2011 to March 30, 2012.) According to the proposal, GOJ plans to review 211 substances.

General Information:

On May 13, 2011, the Government of Japan (GOJ) announced the schedule for agricultural chemical reviews planned during the Japanese Fiscal Year 2011 (April 1, 2011 to March 30, 2012.) According to the proposal, GOJ plans to review 211 substances.

Prior to initiating the review, GOJ will collect scientific data, such as toxicity and plant residue data, from domestic and international sources for each substance. Regarding the data available in the foreign countries, GOJ reaches out to diplomatic missions in Tokyo, including the U.S. Embassy, and requests the existing data used during the chemical review and establishment of the MRLs in their respective countries. After the data is collected, the Ministry of Health, Labor and Welfare (MHLW) will request the Food Safety Commission (FSC) for a risk assessment. Based on the FSC's risk assessment, MHLW will start the discussion to set MRLs by the expert committees.

After MHLW reaches a conclusion, MHLW will share draft MRLs with diplomatic missions prior to submitting a WTO-SPS notification. FAS Tokyo reports every newly proposed MRL from GOJ via GAIN (e.g. JA1033.) Below is MHLW's announcement on the schedule of agricultural chemical review in JFY2011. If you have comments about GOJ's review plans in JFY 2011, please send comments to agtokyo@usda.gov.

Substances that Are Scheduled to Undergo Risk Assessment in Fiscal 2011

In 2006 Japan introduced a positive list system for pesticides, feed additives, and veterinary drugs (hereafter referred to as "compounds"). This system is intended to basically prohibit the distribution of foods that contain compounds exceeding a certain level in Japanese market. At the introduction of the system, Japan provisionally established maximum residue limits (MRLs) for 758 compounds. These provisional MRLs were mainly based on overseas standards including Codex MRLs.

We are working to review the MRLs on the basis of risk assessment reports of the Food Safety Commission (FSC), according to yearly programs. We plan to ask the FSC to carry out risk assessment for 211 compounds in fiscal 2011 (see the accompanying list).

As the result of review, current MRLs for the 211 compounds will be withdrawn if sufficient data required to retain the provisional MRLs as permanent is not available. If you would like the current MRLs to be kept or you want Japan to set MRLs of the same levels as your country's MRLs, we recommend that you promptly contact the Standards and Evaluation Division to have preliminary discussion. You are requested to prepare data shown at the following website before you contact us.

(http://www.mhlw.go.jp/english/topics/foodsafety/residue/index.html)

We add that separately from this document, we will request necessary information to countries based on whose tolerances the provisional MRLs were set.

When we have decided to revise current MRLs, we will give explanation at a future FSG meeting and will notify the WTO in accordance with the SPS Agreement.

You can access current MRLs for the 758 compounds at
